

Print your heart out

A website that lets a person send hugs, kisses, winks and many other expressions in physical gestures, in print. With a webcam, one can record a minute long video in which people can show gestures like hugs, kisses, smiles, sadness or even sending a flower. 33 prints of the video still will be taken and compiled into a flipbook. This flipbook will be sent to the intended person as a gift.

The flipbook will reproduce the video recording as it is flipped.
